

SAFETY MONDAY

March 25, 2013

Spring into Safety

Spring started last week – this means warmer weather and an opportunity to be outside after work and on the weekends. Whether you like to camp, fish, hunt, play tennis, sit on the porch, or just walk around town, it’s a good time of year.

You won’t enjoy the changing of the seasons as much if you are injured, involved in an accident, or are terminated by your employer for violating company safety policies.

Passover starts tonight, and Easter is next Sunday. Many of you will be creating special holiday memories this week. Keep your family in mind when you are at work – they depend on you and need you to come home every day. Working safely helps ensure that happens.
